

MAKERSPACE

A makerspace is a place for kids to create, invent, tinker and learn. I have purchased some high-tech (e.g., robotic cubes) and low-tech (e.g., origami) items for students to explore on days the media schedule is light. I will send an email on the days the makerspace is open. You can send down any student who finishes work early, earned a reward or maybe just needs a break.

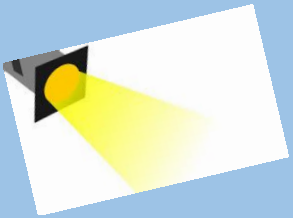

SUPPLEMENTING OUR COLLECTION

Are there books you wish we had in the Media Center to support the standards you're teaching? Please don't hesitate to let me know. I am working hard to update our collection and your suggestions are very valuable!

USE**

RESOURCE SPOTLIGHT

Did you know you can search our entire library catalog from the comfort of your own desktop? Simply [click here](#) for real-time access to Follett Destiny which houses our entire collection. It may be a good idea to add the shortcut to your desktop.

SELF CHECKOUT – IT'S EMPOWERING AND FUN!

Fourth and fifth grade students have been doing a great job with our self-checkout system in the Media Center. We will be expanding the program to third grade once all students know their student ID numbers and passwords.
